Before the FEDERAL COMMUNICATIONS COMMISSION  
Washington, D.C. 20554

In the Matter of LightSquared Subsidiary LLC Request for Modification of Its Authority for an  
Ancillary Terrestrial Component

To: The Federal Communications Commission  
FCC File Number: SAT-MOD-20101118-00239

Technology is an important part of our everyday life, and it's constantly evolving. Yet, here in Las Vegas, many residents still lack easy access. Roughly one in five Latinos still live in a home that's not currently connected to broadband Internet. I know no one place is removed from the hard times our country has face, but Las Vegas has been particularly hard hit. At a time when finding or keeping a job in the state with the highest unemployment rate demands basic computer skills and connectivity, this technological gap excludes disconnected families from new jobs and higher incomes.

I firmly believe LightSquared's unique business model is a solution to that problem. Lowering the cost of mobile internet significantly will allow a marketplace for companies to target needy communities with low-cost communication solutions. I strongly urge you to approve their request for modification of the authority of its Ancillary Terrestrial Component and help bring unfairly disadvantaged immigrant communities into the digital age.

Respectfully submitted,

Cynthia Vasquez  
8050 Paradise Road Ste. 100  
Las Vegas, NV 89123
